

Adventures in STEM

Trees, Trees and More Trees

Name: _____

Date: _____

Fill in the blanks to identify the parts of a tree

Match the term with its definition

Deciduous Trees

Leaves that are stiff and woody, that stay on year-round

Photosynthesis

Trees that lose their leaves in the fall

Broad-Leafed

Leaves that are flat and soft with branching veins

Arboriculture

Cultivation, management and study of individual trees

Needle-Leafed

The process plants use to convert energy from sunlight into energy for food

Name two reasons why trees are important to our world.
